JPSC
JPSC Professional Services

Who we are

At Jones Professional Services Corporation, we offer Microsoft cloud services that make IT easier. For decades, we've had a strong focus on solving major problems for business owners, IT leaders, and project managers. We are proud to have helped organizations do more with the Microsoft 365 platform using cutting-edge business technology and building custom IT solutions.

The benefits of partnering with us

Working with JPSC empowers you to tackle tough enterprise challenges in more constructive ways. We facilitate lateral thinking and alternative problem-solving strategies by devising custom solutions for each situation. Are you ready to take ownership of your technology assets?

Our approach

We take a comprehensive approach to helping enterprises redefine their IT outlooks. In addition to designing, planning, configuring, and helping you deploy Microsoft 365 tools, we ensure you have the knowledge and support to make them worthwhile.

What makes us different

While the goal is simple, it's the execution that sets us apart. JPSC consultants take the time to learn about your business and offer solutions that are sized to give the best return on investment. We're technical consultants with backgrounds in various industries. We use our experience to recommend industry standards and best practices but realize every problem is unique. We make it easier not only to implement new apps and services, but also to maintain and use them efficiently.

Our focus revolves around three principals: Comprehensive tools that are easy to use, time-saving tools so you can focus on your business, and cost-saving tools that reduce overhead.

Unlike other IT consultants, we're just not here to tell you the best way to get things done. We're fully vested in showing you the way firsthand, and we're more than willing to adapt to the way you work

Partnering with JPSC lets you take advantage of:

- **Consistent communication:** We keep you better informed on how your technology stack works in real-time and what to expect from the future.
- **Unmatched expertise:** We've been around for nearly 20 years. During that time, we've helped countless companies and witnessed the ecosystem evolve – giving us the insight to help drive your business towards success.

- **Dedicated human talent:** Our experts are assigned and dedicated to your individual project. We assign an individual or team to work to understand your issues, stakeholder concerns, business philosophy, and growth outlook. You gain the advantage of committed partners who genuinely care about your mission.
- **US-based team members:** Our US-based teams give you the peace of mind in knowing your information is secure and questions get answered during your business hours – no waiting on sleeping resources.
- **Project Management Office (PMO) specialists:** If you're looking for tools to help you manage your projects more efficiently, you've come to the right firm. JPSC specializes in building tools for project management offices. Want to tackle a tough project? We can help you on a case-by-case basis, making it easier to minimize operating costs and still excel.
- **Specialized cloud migration experience:** Moving to the cloud isn't as straightforward as copy and paste. Our team of migration specialists can help make your transition more successful whether you're working with Microsoft SharePoint, Exchange, Project Online, or SQL.
- **Advanced Business Intelligence Solutions:** We go beyond simply helping you tackle tough challenges – JPSC builds solutions for data warehousing, analytics, and reporting to provide insight to your valuable data.

Technology can further your enterprise expansion, but only when you use it wisely. Talk to a JPSC consultant today to ensure the Microsoft cloud works for you.

Everyday Services

Ready to go digital-first or take on a new project? Stop struggling to keep your enterprise moving in the right direction by augmenting your workforce with our specialist team members.

JPSC provides a range of service options that simplify the day-to-day of growing your business, including:

- Virtual System Administrators who can support your infrastructure as needed without you wasting hours on in-depth training or risk falling behind when things get busy
- Virtual CTOs who will help you tackle complex issues like procurement, mergers and acquisitions strategies, security & compliance, hiring, vendor contract negotiations, and budgeting Our service is perfect for businesses who may not need a full-time IT staff or are about to engage in a complex infrastructure change.
- Temporary services including hardware deployment, upgrades, patch applications, security and third-party reviews, Microsoft 365 security and compliance audits
- On-demand support from skilled staff for the busy times and when employees take a holiday

Specialized Support

The pace of business doesn't let up just because you need a break, so your systems must stay operational even when you can't. We're ready to pick up the slack with:

- Live weekend and after-hours support, triage, special project assistance, and migrations
- Fast, knowledgeable, senior-level emergency support from dedicated, US-based consultants

Specialized Projects

We can help you take on specialized projects without skipping a beat. Our unique consulting methodology enhances your ability to pursue growth initiatives by implementing innovative and advanced business solutions in real-time – letting you increase efficiency and improve your bottom line without putting your other enterprise activities on hold.

- Corporate resizing strategies that won't leave you saddled with a behind-the-times infrastructure
- Setting up new offices
- Expanding your business with a cloud presence, physical infrastructure, appropriate project tools, and everything you need to thrive
- Design, planning, implementation that ensures business continuity through transitions and best-practice

Enterprise Consulting That Promotes Sustainable Growth

As a business owner, dealing with technology can feel like wandering through the wilderness. Jones Professional Services Corporation helps you chart a clearer path. We help you pursue not only successful projects but also an improved understanding of how your tech choices impact your viability as an organization.

When you partner with JPSC, you'll get personalized service from a team of highly skilled and experienced consultants dedicated to helping you succeed. We'll work with you to explore your business needs and objectives, enhance your insights with our experienced outside perspective, and develop a custom solution that meets your specific requirements.

Microsoft Technologies

You shouldn't have to struggle to make good use of your technology tooling. Our Microsoft expertise let you explore novel solutions to existing problems seamlessly.

Why not put our insights to work? We'll help you implement proven best practices that eliminate growing pains associated with:

- Microsoft SharePoint Online and Microsoft SharePoint Server
- Microsoft Teams
- Microsoft Project Online and Microsoft Project Server
- Microsoft Project Planner
- Project for the Web
- Microsoft SQL and Microsoft Azure SQL
- Microsoft Exchange server and Microsoft Exchange Online
- Report Design and Business Intelligence
- Microsoft Power Platform: Microsoft Power Apps, Microsoft Power BI and Microsoft Power automate
